Florida Medical Examiners 2018 Annual Report

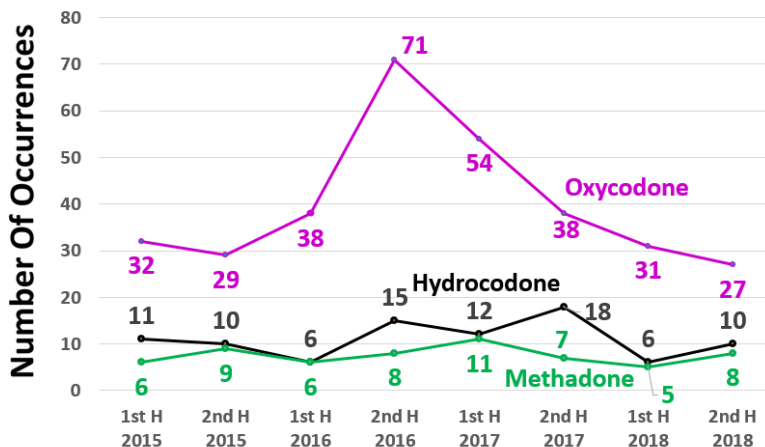

The Florida Medical Examiners 2018 Annual Report has recently been released. The report provides a summary of drug occurrences in decedents for 2018 calendar year. Heroin, morphine, fentanyl and prescription opioid occurrences were identified in deceased persons (top left). There were 207 occurrences of fentanyl and fentanyl analogues in the second half of 2018, meaning there was a 9% increase from the first half of 2018. However, when compared to calendar year 2017, there was an 18% decrease in fentanyl and its analogues for calendar year 2018. Fentanyl was the leading cause of drug-related deaths in Broward County with 287 deaths attributed to fentanyl for 2018.

Heroin, Morphine, Fentanyl, and 3 Other Rx Opioid Occurrences Among Deceased Persons in Broward County FL: Jan 2015- Dec 2018
